RSA FleetActive Sample Policy Statement

Fleet Risk Management Programme

We have developed this risk management programme to establish a policy of accident prevention and committing our business to:

- Reducing accidents and harm to employees and others,
- Eliminating human suffering from accidents,
- Reducing the indirect costs of accidents, and
- Containing the costs of insurance

Our aim is to reduce to a minimum, injuries that employees and members of the public suffer from fleet activities and vehicle accidents.

We must also recognise that accidents have a negative effect on potential for profit. Indirect costs of accidents, combined with insurance costs, are a serious concern and we intend to reduce them by keeping the numbers of accidents to a minimum.

This is an important management responsibility which we will accept and give equal consideration to this as for our procedures for Health and Safety, Quality, Care for the Environment and the volume and costs of Production.

For this risk management programme to be effective, each employee needs to share equally with us in preventing accidents. We fully intend to provide, in administering this programme, the leadership and direction to which supervisors and employees will respond.

We earnestly request that every employees devotes his / her attention to making this risk control programme an integral part of day-to-day business operations.

NB. The policy statement should emphasise the Management's commitment and refer to the arrangements for its implementation often detailed in separate documents. These should include sufficient authority for risk management, clear accountability for its targets, adequate resources to implement the policy, the means of achieving sufficient competence to undertake the Risk Management Programme and the performance criteria supported by the Company's Fleet Management Systems and Procedures.
