

Seven ways to prevent frozen and burst pipes

Escape of water is one of the most common claims made by customers. Especially during winter, when freezing weather can lead to frozen and burst pipes.

That's why we're here for you – to help you prevent frozen and burst pipes, and protect your home. It all starts with these seven steps, and some are even simpler than you may think. And in the event of a burst water pipe, our newly evolved claims process ensures your claim is handled quickly and professionally, by specialist in-house teams.
